3. MAJOR RESULTS OF THE COALITION'S ACTIVITY FOR 2022

In 2022, the Coalition had run into severe problems due to pressure on the part of public authorities caused by events in Gorno-Badakhshan Autonomous Oblast (GBAO). Among persons who applied for legal assistance to Legal Assistance Unit of the Coalition were also relatives of persons arrested in connection with massive protests in the region. In some cases, relatives could not identify the whereabouts of their family members that was quite alarming with regard to potential torture and cruel treatment practices. Among those arrested was also a member of the Coalition, Manuchehr Kholiknazarov, whose interests were also represented by lawyers – partners of the Coalition, and who was subsequently sentenced to 16 years of imprisonment. PO «Association of Pamir Lawyers», which was the member of the Coalition, and was led by Manuchehr Kholiknazarov, had been dissolved.

In the context of these problems, the Coalition is confronted with difficulties as to safety and security arrangements for its members and lawyers that it has been cooperating with. Due to the

deterioration of situation, working with lawyers has become more complicated, since many of them do fear consequences of their participation in addressing politically sensitive issues. This leads to necessity of retaining 2-3 lawyers for security upgrade that has entailed considerable financial costs for payment of fees. The deterioration of situation with human rights activists was also highlighted by Special Rapporteur on HR activists, Mrs. Mary Lolor, during her visit to Tajikistan in December 2022. She has noted that human rights activists, journalists and lawyers are exposed to persecutions, threats, criminalization, unfair legal proceedings and custodial placement due to their human rights activities¹.

Despite these difficulties, the Coalition continued its activity, and in 2022:

- Legal Assistance Unit of the Coalition **has documented** 19 incident reports regarding torture and cruel treatment, of which 4 reports are from women. It continued working on 6 cases of the past years.
- **Rehabilitation** services have been provided to 16 persons, among them 7 men and 7 women. Of the total number of victims, 11 are direct victims of torture and cruel treatment, and 5 are relatives of victims of torture and/or cruel treatment.
- **Media Group** has published 379 materials (press releases, analytics, multimedia/video/audio materials, opinions, information materials, etc.), in Tajik (192) and Russian (213) languages.
- Substantial advances have been made in improvement of the work of the penitentiary system in Tajikistan.
- **Monitoring Unit** of the Coalition has gained access to psychiatric facilities of Tajikistan to conduct independent monitoring.
- It has been developed a program for integrated rehabilitation of convicted and sentenced prisoners as part of reforming the system for execution of punishment under criminal law, including a wide range of measures for medical, legal, social, psychological and religious support.
- It has been developed a brochure on the rights and duties of convicted and sentenced women in accordance with national legislation and international standards that facilitates their sensitization and protection of their rights.

INTERACTION WITH PUBLIC AUTHORITIES

The Coalition continues the active interaction with various public authorities regarding the implementation of international obligations in the field of prevention of torture and other forms of cruel treatment and punishment. These include delivering training events and workshops for representatives of public authorities, review and improvement of legislation, as well as arranging joint round tables and conferences.

As part of educational activities for upgrading qualification and training of the penitentiary system officers, in 2022, there have been trained **110 penitentiary system officers**, including **30 women and 80 men**.

In 2022, the Coalition has also gained access to psychiatric facilities of the Republic of Tajikistan to conduct monitoring of adherence to the rights and safeguards for persons suffering from psychiatric disorders and spending time in psychiatric facilities. It includes the analysis of such aspects as freedom from violence, lawful institutional placement, provision of everyday routine services, therapeutic nourishment, confinement conditions and institutional staff.

- Elobat Ogalikova⁸. There has been elicited a fact of practice of torture and cruel treatment. Specialist of LAU, G. Ashurova, has been providing legal support.
- Zavkibek Saidamin⁹, in the website of «Radio Ozodi», there has been placed a publication in response to his detention, where they have reported on the lack of access to lawyer, and on the lack of information in close relatives about his detention.

Underlying Problems:

- Refusal of law-enforcement bodies and prosecution authorities to admit in evidence the expert findings on actual injuries inflicted on victim of torture.
- Failure to meet the time limit (during 12 hours) for carrying out forensic medical examination in case of torture incident reports.
- Unfounded delaying a pre-judicial inquiry/pre-trial investigation: Investigators do drag pre-judicial inquiry into practice of torture, without giving reasons beyond their control.
- Investigators disregarding the petitions of lawyers on carrying out additional investigative activities.
- Lack of safety and security measures for victims of torture. Refusal of torture victims and their relatives from further appeal of law-enforcement body officers' wrongful actions at different criminal case investigation phases.
- Failure to make medical examination of persons placed in Temporary Holding Facility (THF); denial of access to independent medical specialists (psychiatrist). The existing practice of documenting torture consequences, more specifically: incomplete and incorrect filling out a medical examination form does cause difficulties in protection of the rights and interests of persons who are subjected to torture in THF. Physicians do not qualify for adequate examination of torture victims.
- Lawyers shall provide a signed gagging order/writ, with regard to confidentiality of preliminary investigation, in accordance with Article 177 of the Criminal Procedure Code and Article 361 of the Criminal Code, and this is illegal. Such a gagging order makes it impossible to provide full and unbiased information to LAU, to conduct monitoring of documented cases.
- In some cases, lawyers, who deal with torture issues, do also fear to be overly proactive, even show sensible initiative that is accessible to them by law, yet again fearing potential pressure on them.
- Monitoring of litigation cases has shown that in 90% of cases, legal proceedings do start beyond the appointed hour: delay is from 1 to 4-5 hours that has a negative impact on the access of torture victims and their relatives, particularly from remote regions, to justice.
- When filing an appeal against certain decisions, applicants run into many problems: In practice, procedural time limits of Prosecutor's Investigation (PI) are from 1 to 2 months, upon expiry of which a short notice is usually issued stating that circumstances of torture and cruel treatment during PI have not been proved correct/true. Lawyers are not provided with verification materials, by reference to confidentiality.

-
- Despite the introduction of new orders, there is still existing practice, according to which it is necessary to obtain permission, in order to have a meeting of lawyer with a client, from investigator who carries out criminal case investigation, or from legal investigator. Administration of PTDF will deny access to clients for lawyers without the advance permission from investigator.
 - There is continued practice of holding the detainees incommunicado (no communication with the outer world), particularly in case of grievous and extremely grievous crimes, without granting immediate access for lawyers to their clients. Persons detained shortly before or during holidays often find themselves in a situation when their communication with the outer world is limited due to refusal of THF and PTDF's administration to let pass the relatives and lawyers, making reference to "weekends and public holidays".
 - In accordance with Article 149, Paragraph 2 of the Criminal Procedure Code of RT, prosecutor's office is obliged to issue orders to dismiss criminal complaint. Nevertheless, there is malpractice of giving the so-called "Notice" instead of Order to Dismiss Criminal Complaint (ODCC). The status of "Notice" will prevent from further appealing, and additional time and extra efforts are required to obtain ODCC.
